**Asia Asset Management 2021 Best of the Best Awards  
NAM receives awards in 6 categories,  
the most among all Japanese asset management companies**

In January 2021, Nomura Asset Management Co., Ltd. (NAM) received the following 6 top awards in the performance category of the Hong Kong magazine Asia Asset Management's "2021 Best of the Best Awards", the most out of all Japanese asset management companies.

Category	Name of Winning Strategy
US High Yield (10 years)	NCRAM HY Total Return Institutional
Global Aggregate Bonds (3 years)	Global Dynamic Bond Strategy
Global Equity (3 years)	Global Equity Multi-Theme Strategy
Global Multi-Asset (3 years)	All Weather Factor Allocation Strategy
Asian Bonds (3 years)	Asia Investment Grade Bonds
Global Emerging Markets Debt (3 years)	Nomura Emerging Market Local Currency Debt

The Performance Awards recognize the investment strategies of companies that achieved strong investment performance during each evaluation period through the end of September 2020. Asia Asset Management was launched in December 1995 as Asia Pacific's first trade magazine aimed at asset management companies, pension funds and institutional investors. Each year, the magazine recognizes outstanding financial institutions and pension funds in the Asia-Pacific region through its "Best of the Best Awards". This time marked the 18th anniversary of the awards.

Using these 6 awards as encouragement, at NAM we will continue to strive to improve our investment performance and deliver the most competitive products and services to both domestic and overseas investors, with the aim of becoming Japan's leading investment management company chosen by clients around the world.

## IMPORTANT INFORMATION

This report was prepared by Nomura Asset Management Co., Ltd. for information purposes only. Although this report is based upon sources we believe to be reliable, we do not guarantee its accuracy or completeness. Unless otherwise stated, all statements, figures, graphs and other information included in this report are as of the date of this report and are subject to change without notice. The contents of this report are not intended in any way to indicate or guarantee future investment results. Further, this report is not intended as a solicitation or recommendation with respect to the purchase or sale of any particular investment. This report may not be copied, re-distributed or reproduced in whole or in part without the prior written approval of Nomura Asset Management Co., Ltd.

### ■ Investment Risks Associated with Financial Products

The financial instrument transactions conducted on behalf of the client shall include investments made in shares, bonds with new share warrants, bonds issued by public corporations, and other instruments (including cases where investments are made via investment trusts and through Limited Partnerships). Consequently, the prices of shares and other investments may decline as a result of the effects of domestic and overseas economic variables and political circumstances, fluctuations in interest rates, and changes in the performance and financial standing of the issuing entities, resulting in investment losses.

Financial products may also make use of derivative transactions. Such transactions utilize leverage in excess of the margin amount, and if prices change as a result of the fluctuations in the securities and indexes that serve as the underlying assets, it is possible that losses in excess of the amount of the margin deposited will be incurred. Also, the leverage rates vary continuously as a result of changes in investment policies and domestic and overseas market environments, and consequently they cannot be specified in advance. During the terms of derivative transactions, Nomura Asset Management shall deposit margins taken from the contract assets in amounts that it determines to be suitable based on calculations performed by the securities companies with which the orders are placed.

### ■ Costs Associated with Financial Products (Fees and Other Costs)

Customers pay the following expenses.

All information on this report is intended for information purpose only and does not constitute a solicitation of an offer to buy any investment product nor to enter into an investment advisory agreement with Nomura Asset Management to any persons. The following fees and expenses are charged to investors of our investment products. We can only provide a general description of our fee calculation formula here, as fee rates will vary depending on the specific product characteristics or the specific contract with each of our clients.

- As a consideration of our investment advisory services, fees equivalent to the sum of the assets under contract multiplied by the agreed-upon percentage fee rate (%) will be charged depending on the length of the contract.  
[Calculation formula] Assets amount under contract x fee rate (%) x length of the contract (days) / 365
- Based on mutual agreement, we may adopt a performance-based fee structure or a combination of performance-based fee structure and the flat fee structure mentioned above. We are unable to provide detailed calculation nor the maximum fee for performance-based fee structure as the actual advisory fee vary depending on the investment performance of the relevant strategy, and the agreed terms with each client. Performance-based fee structures will be negotiated individually between client and Nomura Asset Management.
- Separate from the investment advisory fees, securities trading consignment fees and expenses related to the custody of securities will also be deducted from the contracted assets. It is not possible to specify the rate or maximum amount in advance as such fees would vary depending on the status of the investment.
- Nomura Asset Management may, based on its discretionary investment decisions, purchase investment trust products to be included in a portfolio under a discretionary investment contract. In such cases, expenses such as investment trust management fees, sales company and management company fees, and fees charged when converting investment trusts to cash would incur. If such cases investment trust products are issued by our own company or one of our group companies, the investment advisory fees may be adjusted to avoid double payment of management fees. The adjustment calculation methods are specified in each contract. Total investment advisory fees paid by the client shall amount to investment advisory fees less the investment management fees associated with the purchased investment trust products.
