Tokyo, December 20, 2024—Nomura Asset Management Co., Ltd. ¹The PRI (Principles for Responsible Investment) is a set of investment principles proposed by UN Secretary-General Kofi Annan in 2006 and designed to reflect environmental, social and governance (ESG) in investment analysis and decision-making processes. NAM signed PRI in March 2011 and is strengthening its activities related to responsible investment.

As a responsible institutional investor, in addition to contributing to client wealth building through our asset management business, NAM supports the creation of social value by the companies held in our portfolios and pursues a virtuous cycle of investment (investment chain) through our stewardship. We believe that this improvement reflects the long-term cumulative results of our systematic and ongoing efforts to anticipate needs and changes of the times and incorporate them into our ESG-related initiatives.

NAM will continue to address ESG issues while working to secure its place as the Japanese asset manager preferred by clients globally.
