## ***Objective and Features of the Fund***

### 1. Objective of the Fund

The investment objective of the Fund is to appreciate the trust assets by actively managing the investments.

### 2. Features of the Fund

#### ■ Main Subject of Investment

The main subject of investment is Japanese stocks.

#### ■ Investment Policy

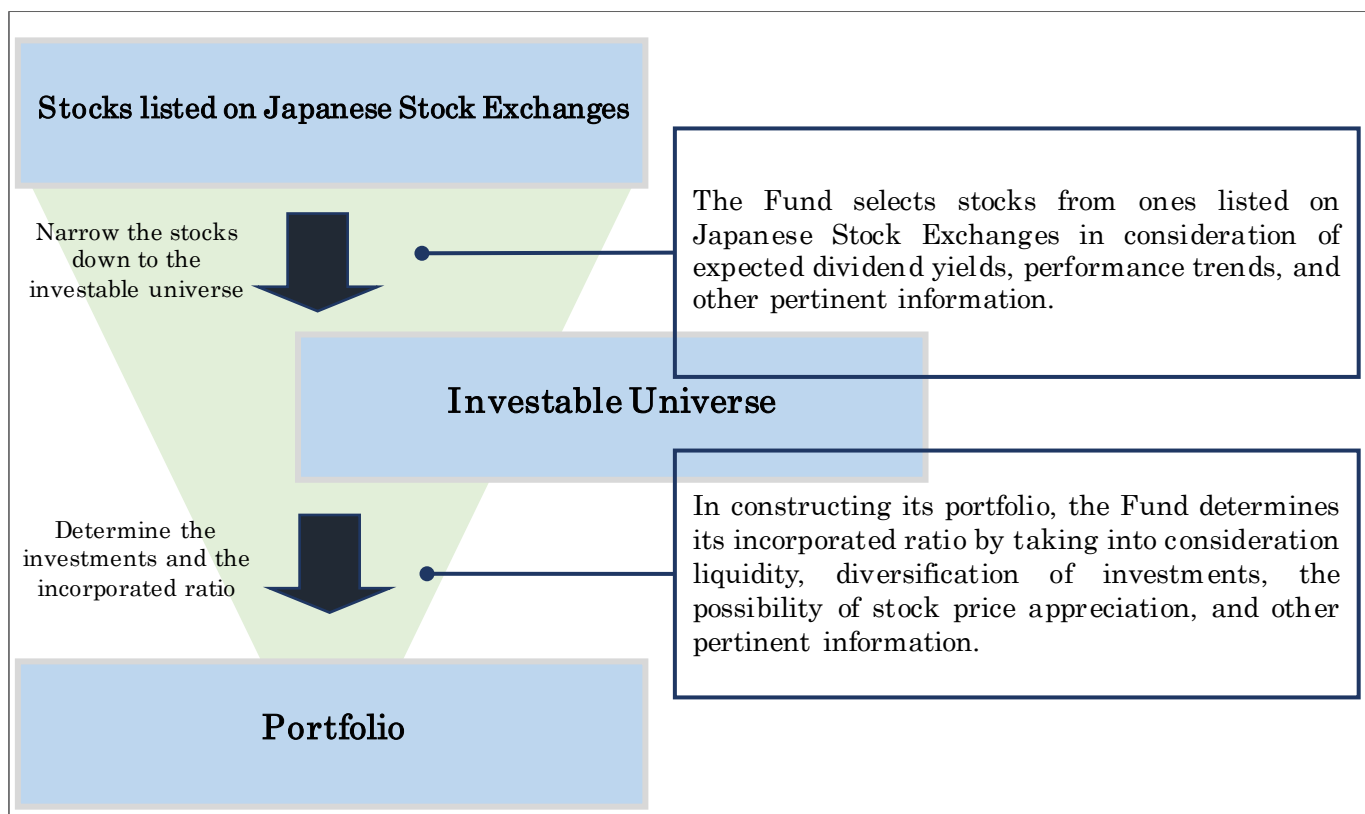

(i) In pursuing its investment objective, the Fund focuses on dividend yields and aims to achieve total returns by obtaining a high level of income gains and medium- to long-term capital gains.

(ii) The Fund selects stocks in consideration of expected dividend yields, performance trends, and other pertinent information.

(iii) In constructing its portfolio, the Fund determines its incorporated ratio by taking into consideration liquidity, diversification of investments, the possibility of stock price appreciation, and other pertinent information.

(iv) The portfolio will be reviewed as appropriate.

### ■ Portfolio Building Process ■

\*The above Portfolio Building Process is subject to change.

(v) In principle, the incorporated ratio of stocks will be maintained high in the Fund.

(vi) In principle, the ratio of non-stock investments (the ratio of investments other than stocks) will be 50% or less than the total amount of the trust assets within the Fund.

(vii) The Management Company may use derivatives, such as stock index futures, to realize gains and losses equivalent to those that arise as a result of holding assets that are subjects of the investment.

Management described above may not be achieved depending on funding or market trends etc.

■ Investment Restrictions

Investment ratio of stocks	There is no restriction on the investment ratio of stocks.
Investment ratio of assets denominated in foreign currencies	The investment ratio of assets denominated in foreign currencies shall be 10% or less than the total net asset value of the trust assets within the Fund.
Use of derivatives	Use of derivatives is restricted to hedging purposes.

■ Distribution Policy

-Dividends are due on the 7<sup>th</sup>\* of January, April, July, and October of each year.

\* The first distribution is on January 7, 2024.

-As a general rule, the full amount of dividends and other income arising from the trust assets are distributed after deduction of expenses. However, the amount of dividends that are payable may in some circumstances amount to zero. Even if any profits are realized from the sale and purchase of individual securities, no dividends shall be paid.

\* There is no suggestion or guarantee regarding the payment or the amount of future dividends.

**Investment Risks**

1. Factors that contribute to NAV volatility

The NAV of the Fund is subject to fluctuations in the prices of the securities, etc., in which the Fund invests. ~~All profits and losses arising from fund management are borne by the investors. Any principal invested in the Fund by investors is therefore not guaranteed. Investors may incur a loss and the value of their investment principal may fall below par as the result of a decline in the NAV. The investment trust differs from a savings deposit.~~

Stock Price Fluctuation Risk	NAV of the Fund may be influenced by stock price fluctuations since the Fund invests in stocks.
------------------------------	---

\* The factors that contribute to fluctuations in the NAV are not limited to those mentioned above.

2. Additional Considerations

The provisions stipulated in Article 37-6 of the Financial Instruments and Exchange Act (so-called “cooling off”) are not applicable to subscription to the Fund.

- In the event that a large number of redemptions occur and it becomes necessary to raise funds for the large number of redemptions within a short period of time or in the event that a sudden change in the market environment in the primary trading market occurs etc., there is a risk that the Fund may not be able to trade at an expected price (based on prevailing market prices) or the trading volume may be limited due to a temporary decline in the liquidity of the assets incorporated in the Fund. As a result of these risks, there is the possibility that the net asset value will be negatively affected, that acceptance of applications for redemptions will be cancelled, or that the payment of redemption proceeds will be delayed.
- Management based upon the investment policy may not be achieved depending on funding trends, market trends, etc., or unexpected circumstances.
- The interest/redemption payment from the issuers of the securities which are incorporated into the Fund may be delayed.
- Transactions pertaining to the Fund, such as an investment in securities and contracts related to such fund, may default because of the bankruptcy, or other similar event occurring to a counterparty.
- The market price of the Fund is based upon supply and demand, as calculated through competitive buying and selling on the exchange. Therefore, market price may differ from the NAV itself.
- Beneficiaries cannot exchange their own beneficial interests in the Fund for the securities which correspond to their share of the beneficial interest in the trust assets of the Fund.
- Please be aware that the Fund will be delisted, and the trust will be terminated if the number of units of beneficial interests is below 500,000 for 20 successive business days after three years have passed from the initial establishment date.

### 3. Risk Management System

The Management Company examines Fund performance and oversees management risks by having established a committee to take charge of these matters.

- Examination of the Fund performance

The committee reports and deliberates on the results of periodic examinations (analysis/evaluation) of the investment trust's trust asset performance results.

- Administration of management risk

The committee identifies and manages management risk and, based on its findings, provides guidance to the appropriate divisional management and any other relevant sections regarding rectification measures for appropriate administration.

※Administration of Liquidity Risk

The committee establishes rules for the administration of liquidity risk, monitors the liquidity risk of assets incorporated in the Fund, and formulates/verifies emergency measures. The committee oversees the appropriate implementation of liquidity risk administration and oversees the liquidity risk administration system.

\*The foregoing descriptions are as of the end of June 2023. Therefore, in the event that tax laws are revised, the tax rates may change.

\*If you choose the Japanese version of the Individual Savings Account (known as “NISA”):

“NISA” is the (Nippon) Individual Savings Account, a tax exemption structure pertaining to a listed stock or a publicly offered stock investment trust etc. If you choose to use the NISA structure, income gains and capital gains from newly purchased ETFs etc., for investments of up to a specified amount each year, will be tax exempt for a specified term. From January 1, 2024, income gains and capital gains from newly purchased ETFs etc. for investments of up to a specified amount each year will be tax exempt for an indefinite term. In order to be eligible for NISA, certain conditions, such as the requirement that the NISA account be opened by an investor with an eligible distributing company, must be met.

In addition, from January 1, 2024, tax exemptions will be available only for financial products that meet the requirements of applicable tax laws (as of the end of June 2023).

Investors should make sure whether or not tax exemptions can be available as this may depend on the method of receiving dividends.

Please confirm this with the distributing company for further details.

\*In the event that foreign tax credit is applied by the investment to assets denominated in foreign currency, tax treatment at the time of receipt of the distribution may differ from the percentage listed above.

\*The aforementioned descriptions do not apply to Japanese corporations.

\*We recommend that investors consult a tax or similar specialist for details of tax treatment.
